---

## Projects

### Weather Website

Dec 2023 - Jan 2024

This Weather website uses HTML, CSS, and JS to fetch weather data from an API and display current weather conditions.

### Sanganak Website

Oct 2023 - Nov 2023

The Sanganak Coding Club Website is a meticulously crafted online platform developed using HTML, CSS, JavaScript, and Bootstrap. This project involved designing an intuitive and visually captivating interface to showcase the club's mission, upcoming events, workshops, and member resources.

### Dhekiajuli Buddies Website

Jul 2023 - Sep 2023

The Dhekiajuli Buddies Website is crafted with precision, this site embodies a seamless fusion of design and functionality, offering a comprehensive overview of the company's details. With a commitment to responsiveness, users can explore our services, team, and engaging articles from any device where every element is thoughtfully curated to elevate the online experience for visitors of the Dhekiajuli Buddies Website.

## Thum Zero Website

Jul 2023 - Sep 2023

Crafted from scratch, this fully responsive platform offers comprehensive insights into the company's mission, services, and team. With seamless scalability across devices, users can explore articles and company details. The website is designed and developed for accessibility and engagement.

## A landing page, Portfolio Website and Temperature Converter

June 2023 - July 2023

A landing page, Portfolio Website and Temperature Converter is a project that demands a foundational understanding of HTML, CSS and JS. learn how to add columns, divide sections, arrange items, and add headers, and footers.

## Portfolio

May 2023 - May 2023

The portfolio website is responsive and built with HTML, CSS, JS, and Bootstrap. Navigate through my details, certificates, blog, achievements, projects, and contact information effortlessly, enjoying a seamless experience across all devices. Explore my professional journey in style and stay connected with my latest updates and projects.
